

Colleagues,

As a truly Worldwide company, Thermeon understands that some of our customers are in peak season, some in off-peak. Either way taking the few minutes each week to assess your business and talk to us about your needs will help us provide you with the latest generation of applications and functions to help increase your profitability.

Have a great 2015 and thank you once again for your continued support.

Terry

Happy New Year! A time to reflect and plan. Roland Keogh, C.S.O Thermeon Worldwide.

Welcome to 2015 and a special welcome to the new clients who joined Thermeon Worldwide in 2014. And to our many long-standing customers and our franchise partners around the world, we hope you all have a productive and profitable 2015. We'll certainly do our best to ensure you have the best resource available to assist with this.

The challenge and benefit of our worldwide business is that we can see the international ebbs and flows of economic cycles and their effect around the world. One region can be in recession but that doesn't stop both leisure and business travel from those markets finding innovative ways of capitalising on new opportunities outside that region.

It is innovation that makes the world go around and we are here to help with your innovative plans for this New Year. We also work with many local and global partners to ensure we have the best possible connections available for our customers to take full advantage of these new opportunities.

During 2014 we presented in our Newsletters new products and enhancements to products that will help your business. These included Customer Experience facilities like Q-Buster, Service and Operations facilities like cars+IR Photos App and business development services like webXML.

We also discussed how Motor Dealerships can take advantage of our professional vehicle rental system to enhance their client offering and business management and how Training can help focus the business to take advantage not just of cars+ facilities but more importantly of business and revenue opportunities.

Talk to your Account Manager or Support Contact about the latest innovations and how we can help you in this New Year
Roland.
