

Colleagues,

As Doug's article highlights, Thermeon has a proven ability to develop clever solutions that help automate your business.

Be it tolling solutions in South Africa and Australia, Mobile applications globally or these North American developments, we develop reliable solutions in a fast, cost effective manner.

If you would like to investigate whether we can replicate these solutions in your region, let me or your local support office know.

Russell

Interface **now** to:

New Technology

Doug Sorenson, Thermeon Worldwide.

Every kid gets excited by a brand new, "cutting-edge", electronic toy. Well, the same is true of the developers here at Thermeon. Give a developer a new device to integrate into [cars+](#) and they are happy for days! In this issue of our newsletter we introduce some of these new "toys" that are available **now** in North America that you may wish to add to your [cars+](#) system.

Equinox Signature Capture.

Using the Equinox L5300 device, you can capture the signature of your renting clients as an electronic graphic and print then on your rental agreement. This device also has a credit card swipe and is designed for future Chip-N-Pin capability.

JumpDrive Vehicle Transponders.

These little devices are installed in a vehicle's OBDII port and communicates with [cars+](#). So when opening a new RA, the car "tells" us what it's current odometer and fuel level is. And at close, they report the check-in odometer and fuel. Want to do a physical inventory check? Vehicles will respond to a cars+-initiated "roll call" and report their presence on the lot.

Equifax Credit Checking.

Afraid to rent your cars to a client with a Debit Card? Let [cars+](#) request an on-line credit check with the Equifax credit bureau. You set your own "risk tolerance". Those whose score is too low are required to secure the rental with another Form of Payment.

Emailed Vehicle Inspections.

Ever had a renter deny causing damage to a vehicle even though it was noted on the check-out slip at Open? ReconPro by AutoMobile Technologies (AMT) helps alleviate this problem. When a RA Opens, basic info from the RA is sent to AMT. On the lot, the agent has a tablet running the ReconPro app. Existing damage is noted on a diagram of the vehicle and the renter signs to accept the inspection. This graphic is then emailed to the renter along with the damage waiver deductible and other information.

Motorola Drivers License Readers.

Cut down on data entry errors by using this device which reads all drivers licensees in the United States and most Canadian Provinces.

Interested and you are a client in North America? Contact your Thermeon Customer Support Representative for more information.

Thermeon has an excellent reputation for delivering both global and region specific solutions, so whilst these are only currently available in North America there is no reason why we cant help you out - wherever you are. Contact your local support or account manager to discuss how we can develop something similar or better in your region!

Want to know more about features mentioned here? Meet us at The International Car Rental Show, Las Vegas. April 17-19

Meet us at booth no: 523
